

CompuMat Access Media:

Key Fobs with Chip

Handy and practical

Key fobs with integrated chip are easy for your guests to bring with them in their pockets, key chains, or in their wallets.

The operation is simple - the chip is simply held up in front of the CompuMat reader unit for identification. Light and sound indicate approval and activation. Simple and easy. Not buttons or display.

A minimum of user guidance is required, and operating errors are minimized.
